

TITLE OF INVENTION

Liquid air freshener and water treatment for use with humidifiers

DETAILED DESCRIPTION OF THE INVENTION

The preferred solution for the liquid additive consists of the following elements:

Fragrance concentrate @ 1.5%

Epamine (disinfectant sanitizer) @ .4%

Biodegradable Lime and Calcium Remover @ 3.9%

Water @ 94.2%

Water based color dye to correspond to the specific fragrance – Trace

The liquid air freshener is then added to the humidifier water at a suggested rate of .5 to 1 ounce for every gallon of water. More or less liquid air freshener can be added for the desired aroma.

CLAIM

What I claim as my invention is: a liquid air freshener and water treatment for the use with humidifiers.
